Databases: SQLite

Other skills: C, C++

PROJECTS

WordBox- Interactive Bookstore Application (github.com/AnalogAnt/WordBox)

An interactive bookstore application using ReactJS. The application allows users to browse and search for books, view book details, add books to a shopping cart, and place an order

Technologies used: React.js, HTML, CSS, JS, APIs

Todos Application (vikastodolist.ccbp.tech)

A robust task tracking system with CRUD capabilities, crafted to simplify task management.

- Designed with HTML, CSS and Bootstrap to ensure a user-friendly interface for managing tasks.
- Dynamic UI updates through JavaScript event listeners and DOM operations for seamless CRUD operations.
- Secure task persistence through local storage methods, ensuring that tasks are never lost.

Technologies used: HTML, CSS, JS, Bootstrap

Wikipedia Search Application (vikaswiksearch.ccbp.tech)

Developed custom wikipedia search application where user can search and view curated results and can see detailed explanation in wikipedia by clicking on the specific result

- Displayed list of search results with HTML list elements with hyperlink as url, styled list using CSS, Bootstrap and implemented responsiveness using Flex properties and CSS Box model.
- Fetched search results from server asynchronously using fetch GET HTTP API call. When a user clicks on a particular result, opens the website in a new tab by using the target attribute of the anchor tag in HTML.

Technologies used: HTML, CSS, JS, REST API Calls, Bootstrap
